Free ECM Flash Program Information Sheet

Included with your purchase of this EFI harness is a FREE ECM flash. This is a basic start and run tune that we only recommend for a near stock application. We will only change the following parameters: delete VATS/PASS-KEY security, cooling fan on/off temperatures, rear end gear ratio, tire size, speed limiter, rpm limiter, idle rpm, and we will adjust the check engine light parameters. If your setup requires any other parameters tuned you will need to locate a local tuner. All ECMs are left unlocked to allow easy access for your tuner.

This process can be completed via this form or online at:

http://www.painlessperformance.com/Memaccess/memberECM

Step 1: Please cut the UPC code from the box as shown in the picture below.

Step 2: Package and mail your **ECM** along with the **UPC code**, a copy of your purchase **receipt**, and your **ECM form** that you are about to complete. We will pay for return ground shipping*. If you request a faster service, you will need to provide a return label.

Step 3: Once we have the ECM, we will use the data from the form to flash the ECM. Then, once it has been flashed we will package the ECM and ship it back to you. If we encounter a question, we will contact you. This process can take 1-3 days.

Step 4: Once you receive your ECM, it is ready to go.

***Note: Our free return shipping is ONLY good for the lower 48 states, via ground UPS. If you are outside of those states, you must provide a return shipping label with your order. If your purchase comes with an ECM, the shipping will be covered via the retailer you purchased from.**
