

# Installation Instructions for 40680 Electronics Mounting Plate

## Mounting Plate Installation Instructions:

1. Assemble the mounting system as shown in the illustration below.
2. Locate the desired location for mounting the Electronics Mounting Plate inside the vehicle.
3. Mark a line along each side and at the top and bottom of each U-channel on the surface to be mounted.
4. Staying on the INSIDE of the lines made on each side about 9/16" (center of usable U-channel), mark the locations desired for drilling the mounting holes.
5. Using the reference lines from step 3 and the hole locations from step 4, measure and transfer the mounting hole locations to the under side of the U-channel.
6. Disassemble the Electronics Mounting Plate and fasten the U-channel to the vehicle using desired hardware (not included).
7. Re-assemble the Electronics Mounting Plate as shown in illustration below.

## Electronics Installation Instructions:

It is best to have all components to be mounted prior to drilling. The table below is for use as a reference for component layout purpose only.

**Warning:** This plate does not offer any vibration isolation. If your component requires vibration isolation the use of vibration mounts will still be needed.

1. Choose the desired layout of your components and mark the mounting plate accordingly.
2. Using the appropriate size drill bit for the component mounting hardware (not included), drill the mounting plate for the desired location.

Component	Overall	Mounting Hole
MSD Digital 6 & 7	9-1/2" x 4-1/2"	8-15/16" x 3-5/16"
MSD 6-Series	8" x 3-1/2"	7-1/2" x 3"
MSD 7-Series	6-3/4" x 4"	4-3/4" x 3-7/16"
MSD Timing Computer	5" x 5-3/4"	4-7/8" x 4-3/16"
MSD RPM Selector	3-1/4" x 2-3/4"	2-5/16" x 2-3/4"
MSD 2-Step	3-1/4" x 2-3/4"	2-5/16" x 2-3/4"
