INSTALL NOTES:

NO DRILLING REQUIRED**INSTALLATION STEPS**

- 1) Install fasteners as shown. Some models may require mounting hole to be reamed out to 1/2".
- 2) Installations on boxed-in frames will be made easier by fishwiring the bolts and spacers into the holes from an existing access hole. Wrap a wire around the threads of the bolt at the end and pull wire, bolt and spacers back through the access hole through the attachment hole.
- 3) Raise the hitch into position, taking care not to push bolts back into frame. The large slot on each side fits over the rivet. Secure each bolt with a 1/2" flange nut.
- 4) Torque all fasteners to 110 lb.-ft.

**PERIODICALLY CHECK THIS RECEIVER HITCH TO ENSURE THAT ALL FASTENERS
ARE TIGHT AND THAT ALL STRUCTURAL COMPONENTS ARE SOUND.**
