

VICTOR SERIES ALUMINUM WATER PUMPS

For 1970-92 429/460 c.i.d. Ford V8s

Catalog #8866 (unpolished), #8876 (polished)

GENERAL INSTRUCTIONS

PLEASE study these instructions carefully before installing your new water pump. If you have any questions or problems, do not hesitate to contact our **Technical Hotline at: 1-800-416-8628.**

• DESCRIPTION

The Edelbrock aluminum water pump #8866 is a heavy duty water pump for both street and racing applications. The pump is a direct replacement for the original equipment pump (Ford #F1TZ 8501-A) to provide compatibility with all accessories and pulleys. It offers weight savings along with increased durability and cooling potential. #8866 is a standard rotation water pump for 429 and 460 engines. Polished Aluminum Water Pump #8876 fits the same applications as #8866.

• INSTALLATION

Installation is the same as for original equipment water pumps.

This pump is designed to work with the original equipment backplate. If new backplate is desired, use Ford #C85Z-8508A. Consult service manual for specific procedures, if necessary. **CAUTION:** Be sure that fan bolts don't protrude through the hub so far that they hit the water pump housing.

• SPECIAL NOTES:

Check closely for any interference with drive belts; some filing for clearance may be necessary with some applications.

• SPECIFICATIONS

Dimension from flange surface to hub:
#8866— 5.50"

• **PLEASE** complete and mail your warranty card. Be sure to write the model number of this product in the "Part # ____" space.

• **THANK YOU.**
