Tools Required:
Phillips / Slotted Screw Drivers
5/16” Wrench

Parts List:
1  Mesh Insert
5  ½” x ½” L Brackets
5  6/32 Nylon Lock Nuts

Read and understand instructions before attempting installation

Step 1
Open the hood and remove the plastic retainers along the top of the grille. This will allow access to the backside of the grille.

Step 2
Center the mesh insert over the factory grille. Place an L bracket onto each stud. Place a nylon lock nut onto each stud. Make sure the L brackets hook over the factory grille plastic. Tighten the nuts till snug. Do not over-tighten the hardware.

Step 3
Push the grille shell back into the factory mounting position and re-install the factory grille retainers. Thank you for purchasing a T-Rex billet grille. 7/24/07
