Professional Wire Tie Gun

For up to 1/4 in. Plastic/Nylon Cable Ties

Read Before Installation

Thank you for your purchase of the Professional Cable Tie Gun.

Before using, please inspect the tool for any damage and check the movement and tension adjuster. If any components are damaged please contact customer service at: 1.800.345.4545.

This gun is intended to let you tighten cable ties to the adjustable tension and cut off excess. If you are having issues, or have questions regarding the use of this tool, please contact our technical support department at: 1.800.345.4545.

Return Information: Before modifying any part of this tool. **Once this tool has been modified it will not be accepted for return.**

Warning

- Pinch hazard. Keep fingers away from the gun's moving parts.
- For use with only plastic and nylon cable ties. **[This will not work on metal cable ties.]**
- Shock hazard. Use caution when working with wiring. Do not use this tool near live electrical sources.

Operation

- Using the adjustment knob, set the tension between 0-3. The number is visible in the sight glass on the handle (see image below). Turn clock-wise to increase tension.
- Loop cable tie around object to be secured. Insert free end into the end of the tool jaw.
- Locate the cable tie latch end to the tool jaw end.
- Pull trigger repeatedly until the cable tie is tightened to the desired tension. When the set tension is reached, the guillotine blade will automatically cut off the excess cable.
