

JEG'S Solid Motor Mounts 555-50510, 50511, 50512 & 50513

The JEG'S solid front engine mounts provide a firm foundation for racing or the serious street enthusiasts. They keep the engine in its place, eliminating the movement caused by flexible, stock rubber mounts. Solid mounts limit engine movement and make linkages operate smoother. (Transmission manufacturers recommend using urethane transmission mounts when using solid engine mounts.)
