

Installation Instructions for 65035 & 65036

Digital Tire Gauge

Installation Instructions:

GAUGE RESET:

- 1) Press ON/OFF button.
- 2) If upon turning the gauge on, a false reading occurs, due to fluctuations in temperature or atmospheric conditions during shipping or other transportation, press and hold the ON/OFF button until four zero's are displayed.
- 3) Release the on/off button and 0.0 will appear.
- 4) The gauge is re-set.

GAUGE UNITS: (Lighted gauge only)

- 1) Press ON/OFF button
- 2) Pressing and holding the 'LIGHT' button longer than three seconds will scroll through four different units of measure: PSI (pressure per square inch), BAR (atmospheric pressure), KG/CM² (kilogram-force per square centimeter) & kPa (kilopascal).
- 3) When the desired units are displayed, release the 'LIGHT' button.
