

# Memcal Installation

JET Powertech Performance Chips (Stage 1 or 2) are easily installed in less than 30 minutes. Locate the E.C.M. on the location chart. **DISCONNECT THE POSITIVE CABLE ON THE BATTERY.** Remove the mounting screws with nut driver or socket (usually 1/4", 7 mm or 10 mm), and pull the E.C.M. out. Remove the Access Cover with appropriate screwdriver. Carefully remove the stock chip from its socket, then attach the stock chip to the JET MEMCAL Adapter (as shown), reinstall the chip and replace the E.C.M.

**NOTE: IF IN THE FUTURE OR AFTER INSTALLATION YOU ENCOUNTER A DRIVEABILITY PROBLEM OR SERVICE LIGHT COMES ON, DO NOT GO TO THE DEALER. CHECK ALL CONNECTIONS. DISCONNECT THE POSITIVE BATTERY CABLE FOR 60 SECONDS. REINSTALL BATTERY CABLE. SEE IF PROBLEM GOES AWAY. IF NOT, CALL THE JET TECH LINE 714-848-5515. BEFORE CALLING IN, PLEASE GET THE 3 OR 4 LETTER CODE OFF THE TOP OF THE COMPUTER.**

- | E.C.M. LOCATION CHART |                                       |
|-----------------------|---------------------------------------|
| 1-                    | Behind Passenger Kick Panel           |
| 2-                    | Under Dash (passenger side)           |
| 3-                    | Behind Glove Compartment              |
| 4-                    | In Center Console                     |
| 5-                    | Behind Drivers Seat (next to battery) |
| 6-                    | Drivers Side Under Hood               |
| 7-                    | Passenger Side-Under Hood             |
