

INSTALLATION INSTRUCTIONS

P/N 63760 Thermostatic Switch for Electric Water Pump Drive

Installation:

- 1) Install thermal switch into pipe fitting in water passage of intake manifold.
- 2) Mount toggle switch to dash board.
- 3) Wire as shown above. Note: Center lead from toggle switch must be wired through a 10 Amp Fuse to battery positive.

Operation:

With the toggle switch in the center position the water pump drive is off.

Place the toggle switch up into the Auto. position and the water pump will come on when water temperature reaches approximately 165° and will go off when the water temperature goes down to 140°. The manual position, switch down, may be used to operate the pump at any time.
