

SWITCH PANEL

INSTRUCTIONS

1. Disconnect battery before beginning installation.
2. Select a location to mount the panel. The panel plate can be used as a template if desired.
3. After you have selected the area to mount the panel, insert all switches and circuit breakers into the panel before mounting it. Switches are installed into the panel from the front, and the circuit breakers are installed from the back.
4. Using supplied connectors, wire each switch to the accessory it will control. The use of 12 Gauge wire is recommended. (See wiring diagram below).
5. Apply appropriate accessory label under each switch.
6. Mount the panel and reconnect the battery.
