

## **INSTALLATION INSTRUCTIONS – 100% NEW Alternators (Absolutely NO Rebuilt Components)**

Thank you for purchasing this alternator. You can depend upon the reliability and consistency of an alternator that is entirely new, while enjoying the affordability of a rebuilt unit. No longer is there reason for compromise. Each alternator is individually computer-tested and supplied with its own Quality Assurance graph documenting the unit's performance.

### **Easy one wire hook-up for hard-to-wire automobiles, trucks, and boats!**

Here is the convenient answer to those hard to solve alternator replacement problems. Just mount this unit so that the pulley rotates and run a 10-gauge wire from the battery (positive terminal) to the back of the alternator. **That's it!** Dependable regulated 12-volt power ready to use.

**Attach 10-gauge hot here and it is ready to supply electricity.**

NOTE: If you experience charging problems after installing, bring RPMs up to 2,500. This will activate the regulator.
