

## Installation Guide for Honda Civic Si PNs 140777, 140777CB, 140803, 140803CB

**\*\*\*\*\* Please compare the parts in the box with the bill of materials provided \*\*\*\*\*  
to assure that you have all the parts necessary for this installation.**

These instructions have been written to help you with the installation of your Borla Performance Exhaust System. Please read this document completely before beginning the installation of your system.

To ensure this part number fits your specific model year, please visit our website for the latest model year listings at [www.BORLA.com](http://www.BORLA.com)

Thank you for purchasing a Borla Performance Cat-Back™ exhaust system.

Borla Performance Cat-Back™ exhaust systems (PNs 140777, 140777CB) are designed for the Honda Civic Si Coupe, equipped with a 1.5L 4-cylinder turbo engine and manual transmission.

Borla Performance Cat-Back™ exhaust systems (PNs 140803, 140803CB) are designed for the Honda Civic Si Sedan, equipped with a 1.5L 4-cylinder turbo engine and manual transmission.

Borla Performance Industries recommends that an exhaust shop or professional after market parts installer, who has all the necessary equipment, tools and experienced personnel needed for proper installation, should perform the installation of this system. However, if you decide to perform the installation, we recommend someone should help you. Ensure the installer uses all under car safety precautions including eye protection.

*Please take time to read and understand the following...*

By installing your Borla Performance exhaust system, you indicate that you have read this document and you agree with the terms stated below.

It is the responsibility of the purchaser to follow all installation instruction guidelines and safety procedures supplied with your Borla Performance Exhaust System.

Borla Performance Industries assumes no responsibility for damages occurring from misuse, abuse, improper installation, improper operation, lack of responsible care, or all previously stated reasons resulting from incompatibility with other manufacturer's products and/or systems.

Included with your Borla Performance exhaust system is a warranty card. Please read it carefully before you begin any work on your vehicle. If you should have any questions regarding our warranty policy, installation, or any other matter pertaining to your new Borla Performance exhaust system, please give us a call at the number provided on the warranty card.

**Minimum Required Tool List:**

**TOOLS:**

1. 3/8" drive ratchet
2. 3/8" drive extension 3"
3. 15mm deep well socket
4. 13mm socket
5. Pry bar

**SHOP SUPPLIES:**

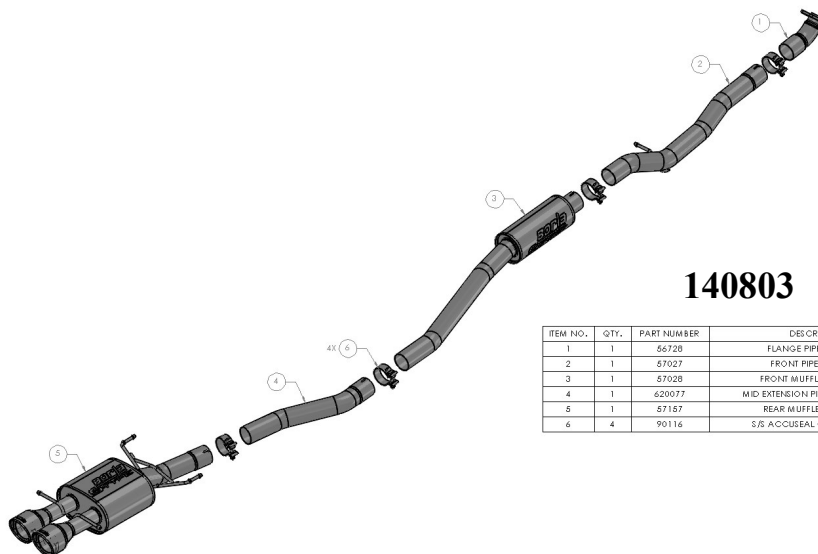

1. Spray lubricant

**Borla Performance - Bill of Materials**

**140777**

ITEM NO.	QTY.	PART NUMBER	DESCRIPTION
1	1	56728	FLANGE PIPE ASSEMBLY
2	1	57027	FRONT PIPE ASSEMBLY
3	1	57028	FRONT MUFFLER ASSEMBLY
4	1	620077	MID EXTENSION PIPE Ø2.75 X 21.25"
5	1	57029	REAR MUFFLER ASSEMBLY
6	4	90116	S/S ACCUSEAL CLAMP: Ø2.75

4	1	620077	MID EXTENSION PIPE Ø2.75 X 21.25"
5	1	57157	REAR MUFFLER ASSEMBLY
6	4	90116	S/S ACCUSEAL CLAMP: Ø2.75

**Caution!!!** *Never work on a hot exhaust system. Serious injury in the form of burns can result if the vehicle has been in use and the exhaust system is hot, allow vehicle to cool for at least 1 hour. Always wear eye protection when working under any vehicle.*

**Note:** *It is our recommendation that you use a hoist or hydraulic lift to facilitate the installation of your new Borla Performance Exhaust System.*

**Taking all under car safety precautions, lift the vehicle using a hoist or hydraulic lift. Once this has been done, you may begin the removal of your old exhaust system from your vehicle.**

**Note:** *Before removing the original exhaust system from your vehicle, please compare the parts you have received with the bill of materials provided on the previous page to assure that you have all the parts necessary for the installation of your new Borla Performance Exhaust System.*

**Note:** *With a used vehicle, we suggest a penetrating spray lubricant to be applied liberally to all exhaust fasteners and allowing a significant period of time for the chemical to lubricate the threads before attempting to disassemble.*

## Original Exhaust System Removal

1. Lubricate all hangers, rubber isolators, bolts and nuts.
2. Remove 3 bolts from front flange and keep hardware for reinstallation (fig. 1).
3. Remove hanger from rubber isolator near front resonator (fig. 2).
4. Remove the crossmember and keep hardware for later reinstallation.
5. Remove hangers from rubber isolators near rear muffler assembly (fig. 3). Please note that not all hangers are pictured in this document.
6. Carefully remove exhaust from the vehicle (fig. 4).
7. Use a flat screwdriver to remove the original ring gasket from the stock system (fig. 5).

## Borla Performance Cat-Back™ Exhaust System Installation

1. Orient components on shop floor according to page-2 drawing.
2. Install original ring gasket onto Borla front flange assembly.
3. Install the **front flange assembly** flange to stock flange using original hardware and tighten the hardware (fig. 6).
4. Re-install the **crossmember** using the original hardware.
5. Place a clamp over the expanded end of the **front pipe** and place inlet over the **front flange assembly** (fig. 7). Do not tighten the clamp.
6. Place a clamp over the expanded end of the **front muffler assembly** and place inlet over the **front pipe** (fig. 8). Do not tighten the clamp.
7. Place a clamp over the expanded end of the **mid pipe** and place inlet over the **front pipe**. Insert hangers into the rubber isolators. Do not tighten the clamp.

**WARNING:** Use extreme caution during installation. Torque all fasteners according to manufacturer's torque values and tightening sequence. **DO NOT** use air impact tools to tighten fasteners on Borla Performance Exhaust Systems. Use of such tools may result in bent flanges or gasket contact areas leading to exhaust leaks.

**NOTE:** When you first start your vehicle after the installation of your new Borla Performance Exhaust System, there may be some smoke and fumes coming from the system. This is a protective oil based coating used in the manufacturing of mandrel bent performance exhaust tubing. This is not a problem and will disappear within a very short period of time after the exhaust has reached normal operating temperatures.

## Borla Performance Cat-Back™ Exhaust System Installation Cont'd

1. Place a clamp over the inlet of the **rear muffler assembly** and place inlet over the **mid pipe**.
2. Insert **rear muffler assembly hangers** into rubber isolators (fig. 11). Please note that not all hangers are pictured in this document.
3. Check your exhaust system for proper clearance under the vehicle and also for tip alignment. Starting at front flanges and moving to rear of vehicle, tighten flange hardware bolts. Orient position of bolt (on supplied clamps) between (not over) pipe notches and tighten to 35 ft. lbs. torque.
4. Align tips and tighten hardware. Loosen clamps to rotate or slide pipe for better alignment.
5. Before starting your vehicle, make sure to check all wires, hoses, brake lines, body parts and tires for safe clearance from the exhaust system.
6. Start vehicle and check for any leaks. If any leaks are found, determine cause (such as loose or incorrectly positioned clamp) and repair as necessary.

**WARNING:** Use extreme caution during installation. Torque all fasteners according to manufacturer's torque values and tightening sequence. **DO NOT** use air impact tools to tighten fasteners on Borla Performance Exhaust Systems. Use of such tools may result in bent flanges or gasket contact areas leading to exhaust leaks.

**NOTE:** When you first start your vehicle after the installation of your new Borla Performance Exhaust System, there may be some smoke and fumes coming from the system. This is a protective oil based coating used in the manufacturing of mandrel bent performance exhaust tubing. This is not a problem and will disappear within a very short period of time after the exhaust has reached normal operating temperatures.
