ORACLE LIGHTING

PRE-RUNNER GRILL KIT
PART #5870-002
INSTALLATION GUIDE
FOR TECH SUPPORT, PLEASE CONTACT US @ 1-800-407-5776
VIDEO INSTALL
TOOLS NEEDED: PANEL TOOL / WIRE CRIMPS / 8MM SOCKET / 10 MM SOCKET

Use a panel tool or flathead to remove the retainer clips across the top. Firmly pull bottom of grill outward.

Pull the fender liner back slightly to access the park light harness. Remove the 3 outer fasteners.

Next, we'll unbolt these (2) 8mm bolts and (1) 10mm bolt.

Thread the locking nuts onto each bolt light.

View from front of grill.

Group your cables together at the center. Crimp the red wires together and the black wires together.

Replace grill. Route red wire through the core support and around the passenger HL.

Route the black wire along the passenger fender to the ground post. Ground post is a 10mm bolt.

Locate the parking light bulb plug. T-Tap the red wire to the white with brown striped wire for power. Turn on park mode to test.
