

VICTOR SERIES ALUMINUM WATER PUMPS
Reverse Rotation for 5.0 Litre Ford V8s with Serpentine Drive Belt; 1986-93
CATALOG #8840 (unpolished), #8845 (polished)
GENERAL INSTRUCTIONS

PLEASE study these instructions carefully before installing your new water pump. If you have any questions or problems, do not hesitate to contact our **Technical Hotline at: 1-800-416-8628.**

• **DESCRIPTION**

The Edelbrock aluminum water pump is a heavy duty water pump for both street and racing applications. The pump is externally the same as the original equipment pump (Ford #E9TE-8505-A4A) to provide compatibility with all accessories and pulleys. It offers weight savings along with increased durability and cooling potential. #8840 is a reverse rotation water pump for 1986-93 5.0 Litre V8s with serpentine drive belt. Not for early standard rotation 289-302 engines.

Polished Aluminum Water Pump #8845 fits the same applications as #8840.

• **INSTALLATION**

Installation is the same as for original equipment water

pumps. Consult service manual for specific procedures, if necessary.

- **CAUTION:** Be sure that fan bolts don't protrude through the hub so far that they hit the water pump housing.

NOTE: Remove two screws from backing plate and apply RTV silicone to gasket just before installation. Reassemble backing plate and install on engine using RTV silicone.

• **SPECIAL NOTES:**

Check closely for any interference with drive belts; some filing for clearance may be necessary with some applications.

• **SPECIFICATIONS**

Dimension from block surface to hub:

#8840— 5-3/4"

PLEASE complete and mail your warranty card. Be sure to write the model number of this product in the "Part # ____" space.

THANK YOU.
