

Warranty and Disclaimer

Within **THREE years after the purchase date, the original buyer** may return any product that has failed due to a defect in materials or workmanship. Products that have one or more LEDs fail to illuminate due to a defect in materials or workmanship are covered with a **THREE year warranty for the original buyer**.

Installation of this product must be performed by a licensed professional. Should the failure of the product be the result of damage occurring as a result of improper installation, alteration of the product or an act or omission on the part of the consumer, this warranty is void. XKGLOW Lighting shall not be responsible for any consequential damages which arise from the use and/or installation of the product. If the kit is installed in any manner other than specified, XKGLOW Lighting reserves the right to deny any warranty claims at the discretion of the technical support department. Any product return must include the original packaging, invoice number and a statement of the alleged defect. Upon receipt of the returned product, the company will test the product for defect. If the results of the testing do not support the warranty claim, do not reveal any defect or indicate consumer negligence in the installation and handling of the product, then the product will be returned to you, and you will be charged a reshipping fee. If the product is returned from an address within the continental United States, within the first 30 days after purchase, and is found to be defective, XKGLOW Lighting will exchange or refund the original purchase expense. This offer does not extend to the cost for shipping charges on any international packages.

Additional Disclaimer Terms

Please check your local and state laws for the proper use of this product.

- Improper installation of electrical products such as lighting may cause damage to any vehicle or device to which the improperly handled or installed lighting is attached.
- Improperly installed product may cause electrical injury to persons.
- It is recommended that the kit should be installed by a licensed professional.
- XKGLOW assumes no liability for the installation of the product.
- Warranty or liability will not exceed the product purchase price, which shall be buyer's sole and exclusive remedy.

Return/Exchange Procedure

1. Email [xk@xkglow.com] to notify us of the product issue as well as the item number and name of customer on invoice.
2. We will send you the trouble-shooting guide to fix the issue, or to narrow down which of the component(s) need to be replaced. If the issue still exists, we will ask you to send back the defective items to be replaced.
3. Please send the returned item as instructed, along with claims and a telephone number where you can be reached.

After the returned item(s) have been accepted and inspected, we will issue a refund or replace the items ASAP. For refunds, item(s) must be sent to XKGLOW within 14 days from date of purchase. Original shipping charges are not refundable.

We always stand behind our products and are committed to our customers! For questions you may have, please contact xk@xkglow.com. We normally respond within 24 hours. (Monday-Friday).

Instructions

1. Open back door and remove the OEM tail light.

Start by opening the back door and locate the panel in **Example 1**, remove the panel. Once the panel is taken out, remove the screw shown in **Example 2**. Now the tail light is free and can be pulled out, pulling away from the back of the Jeep. Once the housing is removed, disconnect the tail light by sliding the red tab out and unplugging the harness shown in **Example 3**.

Example 1

Example 2

Example 3

2. Transfer OEM hardware to the new tail light.

Remove the 3 fasteners (**Example 4**) and remove the bracket from the light. Line up the bracket with the new light, and install the 3 fasteners into the new tail light.

Example 4

3. Install new tail light into Jeep.

Start the installation of the new tail light by plugging in the harness. Firmly snap the plugs together, until you hear a **click**. After it is plugged in, line up the tail light with the opening of the Jeep, and push it in place. Once it is in place, reinstall the screw that was removed in **Example 2**. After the screw is tightened, put the panel back over the screw. Once complete the outcome should be like **Example 5**. Repeat this same process for the other tail light.

Example 5

TEST FUNCTIONALITY

Be sure to test all functions: running, brake, turn signal, and reverse lights before driving.
