

Installation Instructions for 100835, 100836, 110835 & 110836 Dual-Feed Fuel Line Kits

BE CAREFULL – this part is manufactured with aluminum fittings & braided steel hose which are more fragile than steel or brass components. DO NOT OVERTIGHTEN THE THREADED FITTINGS!

Confirm that all fittings & components are tight and check for leaks before starting your vehicle. Take precautions when working with gasoline or alcohol – it is a fire hazard and is potentially explosive.

100835 & 110835 Fits Holley® Ultra HP Aluminum Carburetors (4150 Style), -06 AN Inlet
100836 & 110836 Fits Holley® Ultra HP Aluminum Carburetors (4150 Style), -08 AN Inlet

Remove the bowl fittings from the Ultra HP Aluminum Carburetor and screw in the longer bowl fittings included with this fuel line kit. These bowl fittings are an -08 AN thread and use an o-ring to seal instead of a gasket. The length of this fuel line is longer than normal and designed to work with the Holley® Ultra HP Aluminum Carburetors since they are machined for the -08 AN thread & o-ring.
