

Installation Instructions for 10225 & 10226 Dropout Battery Box

***Note:** Please read this entire instruction sheet before attempting to install

Parts Included:

- Battery Box
- Hold Down Strap Plate
- “J” Hook
- Lock nut
- Washer

Instructions:

1. Clear an area on the frame to the dimensions of 12-1/4” wide x 8-1/4” deep from the frame to the outside edge of the battery box as well as a clear area underneath the box for the dropout.
2. Disassemble the sliding plate from the back of box; use this sliding plate as a pattern for drilling your mounting holes through the frame.
3. Bolt the sliding plate to the frame (mounting bolts not included).
4. Install the battery into the box and secure it in place with the hold down bracket and “J” hook provided.
5. Use the slot on the back side of the battery box that best fits the size of your battery. This box is designed for either a top post or front side terminal battery.
6. Slide the battery box up into the mounted receiver far enough to catch in the first latch position. This is the “service” position.
7. Connect the battery cables.
8. Push the battery box up into the “locked” position. “Service” (Down) Position “Locked” (Up) Position
