

Installation Instructions for 15965, 15966 & 15967 170 GPH Mechanical Fuel Pump

Installation Instructions:

NOTE: Requires the use of a fuel pressure regulator such as the JEGS 555-15908 or 15909. Please consult with a JEGS technical representative for application recommendations.

A thread locker, such as Permatex 775-24200, should be applied to the inlet and outlet fittings. This helps to ensure that the fittings do not loosen in the housing during heat cycles.
