

## ***Installation Instructions for 601025 & 601026 Pivot Ball Bracket***

**Note:** Due to the varying differences in bellhousing castings and thicknesses some trimming may be required to the bracket, bellhousing or both.

Note: Bellhousing bolts are not included due to varying thicknesses of bellhousings. A Grade 8 bolt is recommended.

### **Installation Instructions:**

- Be sure when mocking up clutch pivot location that the block/motor is in the correct/final location and the bellhousing is bolted to the block/motor.
- Use Red bolt locker such as JEGS # 555-28080 on pivot ball stud nut and bellhousing to block bolts.
- Check for proper clutch engagement and disengagement before finalizing this step in your project.
