

## ***Installation Instructions for 75100 to 76108***

### ***Panel Fix***

#### ***Repair Tape***

**A Breeze to Use! Cut it, Peel it, Stick it, Seal it!**

**CUT:** Leave back on tape and cut to desired size.

**PEEL:** Remove back and apply to a clean surface.

**Note:** Panel fix may resist bonding to the following surfaces: Plasticized materials, siliconized, greasy, oily, dirty or porous surfaces, waterproof or water-repellent materials and fabrics. Test before use.

**STICK:** Press firmly. Remove air pockets and bubbles

**SEAL:** Water, air, and moisture will be completely sealed out. Once applied, Panel Fix cannot be moved. The warmer the sealing compound is the better. It is easier to form and shape to the surface.
