

## ***Installation Instructions for 80082 JEGS Tubing Straightener***

1. Securely attach the Tubing Straightener to a work bench or in a vise. See Figure 1.
2. Insert the tubing to be straightened in either end of the Tubing Straightener. See Figure 2.
3. Adjust the handle on top of the Tubing Straightener so the tubing is held firmly in place while still being able to pass through it. Be careful not over tighten and crush or dent tubing.
4. Push/Pull the tubing through the straightener to the desired length.
