E.C.M. LOCATION CHART

- 1. Behind Passenger Kick Panel
- 2. Under Dash (passenger side)
- 3. Behind Glove Compartment
- 4. In Center Console
- 5. Behind Drivers Seat (next to battery)
- 6. Drivers Side Under Hood

INSTALLATION

JET Powertech Performance chips (Stage 1 or 2) are easily installed in less than thirty minutes.

Disconnect negative side of battery. Locate the ECM (see ECM Location Chart). Remove the mounting screws with nut driver or socket (usually 1/4", 7mm or 10 mm), and pull the ECM out. Remove the access cover with appropriate screw-driver. Carefully remove the stock chip from its socket, then gently insert the Powertech chip. Replace the access cover and the ECM and thats it.

ECM/INST
