

INSTALLATION INSTRUCTIONS

Part Number: 33-5026

This filter fits: See catalog for current applications

* FREE K&N® decal To register your warranty, please see us online at knfilters.com/register. FREE K&N® decal *

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modification will be required. However the following procedures MUST be followed to ensure the proper fit and seal of the K&N® air filter.

INSTALLATION:

1. Remove stock filter.
2. Insert K&N® filter in K&N® plastic frame. **NOTE: Filter and frame will only fit in one direction.** (See fig. 1)
3. Slide the K&N® filter towards the K&N® logo on the plastic frame. (See fig. 2)
4. Install K&N® filter with K&N® frame into air box. (See fig. 3)
5. Push the filter completely into the air box. (See fig. 4) **NOTE: Filter will slide over the plastic frame.**
6. Place lid back on air box.

CLEANING:

K&N Engineering, Inc., suggests checking the air filter element periodically for excessive dirt build-up. Depending on your driving conditions, we recommend cleaning your air filter every 50,000 miles. To clean and re-oil, purchase our filter Re-charger® service kit, part number 99-5050 or 99-5000 and follow the easy instructions.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
