

INSTALLATION INSTRUCTIONS

P/N 65227 - CARBURETOR JET EXTENSION KIT

Included in this kit are three sets of jet extensions which may be reused many times. They should be used as follows:

- 1/2" Use with stock Holley center hung float bowls.
- 3/4" Use with Moroso part #65221 Fuel Level Control Kit
(Requires notching of foam anti-slosh baffle)
- 1" For custom fit applications

Installation

The extension tubes are a tight fit on the jet to ensure that they will not fall off. They must be tapped lightly onto the jet with a hammer. Use extreme caution not to damage the metering block during installation. Remove any plastic chips from inside tube after installation. When using brass floats, the 1/2" extensions must be shortened to 3/8" to clear float.

Suggested Applications

DRAG RACE: SINGLE OR DUAL 4 BBL MOUNTED STRAIGHT - INSTALL EXTENSIONS ON REAR JETS.
DUAL 4BBL MOUNTED SIDEWAYS - INSTALL ON ALL JETS AS SHOWN IN DIAGRAM.

OVAL TRACK: INSTALL ON REAR JETS.

PARTS LIST

- 2 1/2 IN. JET EXTENSION
- 2 3/4 IN. EXTENSION
- 2 1 IN. EXTENSION
