

Part #2458 Instructions

This package contains a large and small diameter fitting to match the fuel line fittings on your TBI unit. Attempting to install the wrong fitting will damage TBI fuel fitting threads.

1. Ensure the fuel system is depressurized.
2. Detach the fuel lines from the TBI unit fuel fittings. Check that any old seals/o-rings are removed from the TBI unit fittings. **DO NOT REMOVE the fuel line fitting from the TBI unit!**
3. Apply a small amount of lubricant to the o-rings and install on extensions as shown here.

4. Thread male end of extension fittings into TBI fuel line fittings and tighten.
5. Attach the fuel lines to the female end of the extension fittings and tighten.
6. Pressurize fuel system and check for leaks.
