

INSTRUCTIONS

Congratulations on your purchase of Covercraft's Snap-Ring TireSavers™. Our exclusive spring-steel ring design makes our product easy to install and remove while providing excellent protection.

1 - Installation and Removal

To install, simply spread the TireSaver, slide it over the tire and let the ring "snap" back into place on the back side of the tire.

Remove the TireSaver in the reverse fashion.

2 - Care and Maintenance

Use cool/warm soapy water and a soft nylon brush or cloth, when necessary, to clean your TireSavers. Rinse off residual soap with clean water. Any major brand of vinyl protectant may be used, if desired.

DO NOT put TireSavers in a washing machine or dryer!

Have a technical question? Call 800-4-COVERS, Monday thru Friday, from 8AM to 5:30PM CST.
