INSTALLATION INSTRUCTIONS

CAUTION: Proper service and repair procedures are essential for safe and reliable installation of chassis parts, and require experience and tools specially designed for the purpose. Installation of these parts by persons other than qualified mechanics could result in an unsafe vehicle and/or personal injury.

CAUTION: Be certain to position rear bushing in lower arm so that flat on flange is toward outboard or wheel side of arm, to pro vide clearance to weld around torsion bar opening insert in arm. Otherwise, bushing flange will not seat flush on arm surface an damage to bushing could result.

NOTE: The parts in this kit are designed to replace the worn or non-functioning original equipment parts in the vehicle as produce by the car factory. These parts are not designed for installation on vehicles where the suspension and/or steering systems have been modified for racing, competition, or any other purpose.
