**Part # 1511,15110- 1979-93 351 Windsor Mustang Swap**

# BBK Shorty Headers

## Special Tools Required:

- No special tools required

## Install Time:

Approximately 2 Hours

## Difficulty:

3 out of 5

Follow these instructions carefully to ensure correct fitment and operation.

### STEP 1

- Disconnect the negative battery terminal.

### STEP 2

- Remove the entire stock air inlet system from the vehicle, this is easily done by removing the hose clamp at the throttle body, the two mass-air mounting bracket bolts from the strut tower/inner fender well area, and the two filter box mounting nuts at the top edge of the factory box.

### STEP 3

- Remove the air injection tubes from the passenger side. *NOTE!!! On 1994-1995 models, remove the steel EGR Tube mounted on the passenger side header, kit 1525 and 15250 include a new EGR Tube Assembly.*

### STEP 4

- Remove the spark plugs and spark plug wires from the vehicle.

### STEP 5

- Working from under the vehicle, remove the nuts connecting the H-Pipes to the factory exhaust manifolds and the nuts holding the mufflers to the H-Pipe and slide back a few inches for clearance.

### STEP 6

- Remove the stock exhaust manifolds and clean any gasket material from the heads. (Header removal and installation is done at the top of the engine compartment).

### STEP 7

- Using the gaskets provided start all the new header bolts before tightening the new headers.

### STEP 8

- Reverse the previous steps to complete the installation.
