

2006-2013 Corvette Z06

2008-2013 Corvette C6

2010-2013 Corvette Grand Sport

Cold Air Induction

Part # 1749

Special Tools

Required:

- No special tools required

Install Time:

Approximately
1 Hour

Difficulty:

3 out of 5

Follow these instructions carefully to ensure correct fitment and operation.

STEP 1

- Loosen the hose clamp on the air inlet tube at the throttle body. Unplug the mass air meter on the side of the plastic inlet tube. Disconnect the plastic breather tube that sticks straight up on the passenger side of the inlet tube. Pull up and remove the stock assembly.

STEP 2

- Remove 2 of the rubber grommets from the stock assembly and install them into the BBK inlet casting.

STEP 3

- With a T20 Torx, remove the mass air meter from the stock inlet tube. Install the mass air meter into the BBK casting using the supplied hardware.

STEP 4

- Put the filter on loosely and push it all the way back, then slide it forward into position and tighten after fitting into the car.

STEP 5

- Slip the supplied rubber coupler over the BBK inlet opening and slide 2 of the clamps into place.

STEP 6

- Install the supplied rubber grommet into the hole on the passenger side of the casting for the breather tube. Remove the tube from the stock inlet hose and install it into the grommet.

STEP 7

- Drop the assembled BBK Cold Air Induction System into place, line up the holes in the rubber mounting grommets with the stock mounting pins.

STEP 8

- Connect the rubber coupler to the throttle body and position the clamps into molded grooves. Push down on the inlet casting to set the pins into the mounting grommets.
- Tighten the clamps on the coupler at the throttle body. Plug in the mass air meter and reconnect the negative battery terminal.
