

Instruction Sheet DCF-319
for Mopar Performance Kit P4876821

This package consists of one torque converter flexplate and this instruction sheet. The flexplate is for use with a 6-bolt crank flange and the smaller 5/16" converter attaching bolts.

The 5/16" torque converter bolts are serviced in P4529591 (4 per package). There are 4 - 5/16" attaching bolts and 6 crank bolts in package P4876820.

This flexplate is NOT SFI approved.

Most race converters use the larger attaching lugs. The 6-bolt crank, large lug flexplate is P2466326 while the 8-bolt crank, large lug flexplate is P2466715. There are "SFI" versions of both. (See latest Mopar Performance catalog for part numbers). The Magnum 318 flexplate is P4876703 and the Magnum 360 flexplate is P4876706.

The 5/16" torque converter attaching bolts (flexplate to converter) are torqued to 270 in-lbs.

The flexplate to crank bolts are torqued to 55 ft-lbs.
