Any and all needed parts will be shipped to you directly. (DO NOT return whole kit to store)

Metric
Wrench
(5 mm)

Sport Trac
Brackets (x4)

Replacement
Metric Screws (x4)

PARTS INCLUDED IN YOUR KIT. You may want to lay them out in this manner for accessibility.

1

Wash truck bed.

2

Remove paper tape from all rails. Discard properly.

3

Depress the mechanism, release, and remove one corner from cab rail.

Feed tarp dowel into cab rail.
(NOTE: For easiest feeding action, place tarp on a flat smooth surface, and keep dowel straight while feeding into cab rail. Caution, pavement may scuff tarp.)

Reinsert corner piece into cab rail until it "clicks" and locks into place.

4

Place assembly over truck box. Center between cab and tailgate.

Off the truck bed, connect the end rails to the two side rails.

Item No. 0005-0102RH Printed in U.S.A.

5

Place the rail assembly over the side of the truck box. Center rails evenly between cab and tailgate.

6

Side Rail Clamping (Same for each side)

Remove two hex socket screws from the inside of the Sport Trac payload bed. Place Sport Trac Bracket over screw hole and replace with provided metric screws and secure firmly into bed wall with metric wrench.

Note: Insert side rail clamp all the way into rail.

Top each bracket with a rail clamp, (long-neck at the cab end, and short-neck at the tailgate end), and secure with a clamp bolt.

7

Insert bow onto top or bottom peg.
(Top peg for performance, Bottom for good looks.)

Ends are spring loaded for easy installation. Push and hold on spring end and let the other end slide on with the spring action.

Upper Peg

SPECIAL FEATURE:
Two pegs offer two height adjustments.

Note:
Bow End does not fit between pegs.

Do Not Place Between the Pegs

8

A. Release lever on both corners of tailgate rail and tilt up rail.

B. Attach tarp at front by pressing down on edge of tarp with the palms of your hands (about only 12 inches on each side). Then hook tarp to the tails rail's groove and click down to tighten tarp. See close-up.

Close-up of downward rotation of rear rail. You will feel the "snap" effect and see it tighten snugly.

C. Finish attaching tarp along each side by pushing down and sliding your hand towards each corner. You can feel the "grip" action.

For Tuff Tonno III:

For Saber Tonno:

A. Attach tarp from front corner (12 inches). Repeat for each side.
Note: Pull tarp out while pressing down in center of the side strip to flex hook open for easy attachment.

B. Secure tarp at the middle of tailgate rail.

C. Finish attaching tarp along each side by pushing down and sliding your hand front to rear, and on tailgate rail, by pressing out from the center.

EASY USE OF TRUCK BED

Tarp may be rolled up and secured with Velcro® for bulk hauling
