## **Mustang Logo Plate**

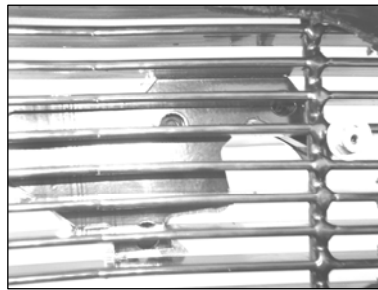

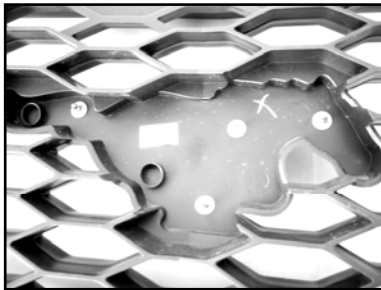

### **Recommended Tools:**

10mm Wrench or Nut Driver  
Drill & 3/8" Drill Bit

### **Parts List / Hardware:**

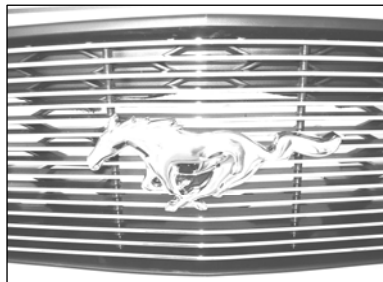

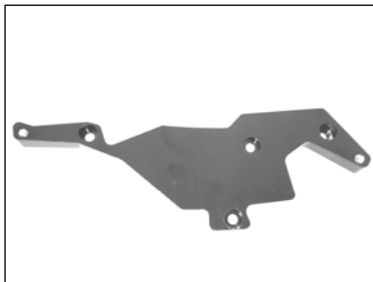

- 1 Billet Logo Plate
- 2 10-32 x 1.5" Threaded Stud
- 2 10-32 Nylon Lock Nuts
- 4 #10 Fender Washers

### **Read and understand instructions before attempting installation**

#### **Step 1**

This billet plate allows the factory logo to be installed on a T-Rex billet grille. Carefully remove the small metal retaining fasteners securing the logo. Use a small slotted screw driver to pry the clips up. Now carefully twist off the fasteners.

#### **Step 2**

Attach the Mustang logo; use the factory fasteners to. The back of the plate has two threaded holes; secure the studs here. Center the logo over the billet grille; use the washers and nuts to retain the logo.

#### **Step 3**

When installing the billet assembly onto the factory grille; the retaining nuts slightly interfere with the logo mounting area. Drilling a 3/8" hole aligned with the nuts will allow the billet to sit correctly; or the black plastic honeycomb may be cut from the center of the grille as shown in the picture (bottom right). ***Thank you for purchasing your T-Rex billet grille. 6/15/05***
