Steering Tie Rods
1967-76 Chrysler A-Body

Thank you for your purchase from our new line of B & E-Body parts.
Please call us at (877) 4NO - ROLL if you have any questions
regarding the service or installation of your Hotchkis products.

Before You Start:

Please read the entire manual before starting. These steering tie rods were designed to reduce weight, provide rigid steering feel, and allow for shimming for reducing bump steer. We highly recommend using our (P/N:1110) Upper A-Arms in conjunction with your Hotchkis steering tie rods for maximum suspension geometry and performance.

1. Raise Vehicle

Raise the vehicle and put it up on jack stands. You may also use a 2-post or 4-post lift.

2. Remove Stock Steering Tie Rods

Remove the left and right stock steering tie rods from the vehicle. A big hammer is your friend in removing the ball joint studs from center link and spindle. A pickle fork may be needed if they are really tight.

3. Set Initial lengths for the Hotchkis Tie Rods

With the stock tie rods off, measure the center to center dimension of each link. Spin the hotchkis turnbuckle so that the center to center dimension matches the stock part. This will be an initial setting. A front end toe alignment will be needed once the tie rods are in place.

4. Install Hotchkis Steering Tie Rods

The diagram below shows the order of the parts. The generic pieces labeled X and Y represents the vehicle's center link and spindle consecutively. They are shown for assembly purposes and are not included in the kit.

- A) 1/2" x 3" hex bolt
- B) 1/2" SAE washer
- C) Misalignment Spacers
- D) Taper Adapter (note direction: tapered section inserts into tapered hole)
- E) 1/2" Nylock Nut
- X) Center Link
- Y) Spindle

5. Finishing Steps

Once the tie rods are bolted up, please have an alignment shop set your front toe setting. Hotchkis suggests 1/16" of TOE-IN.
