

DESCRIPTION

The new Ford Focus ST is a very capable high performance hot hatch. Installing our new adjustable Sport Sway Bar System takes it to a new level of handling performance. Spirited street cruising and competitive track driving are even more enjoyable due to improved cornering performance, driver feedback and traction. Our engineers have spent hours on the street and test track developing the best Sway Bar combination for ultimate performance improvement. Besides the very noticeable street driving improvement, they work extremely well in autocross, road course and open road-racing applications. Our 32mm lightweight hollow steel Front Sport Sway bar is 130% stiffer than stock for reduced roll, increased grip and quicker steering response. Our 2-way adjustable 25.5mm hollow steel Rear Sport Sway bar is 30% / 45% stiffer than stock for increased roll stiffness, allowing easier corner entry rotation and faster drive off resulting in higher corner exit speeds. Our lightweight hollow Sport Sway Bars are formed on our unique CNC bender for precision, powder-coated gloss black for durability and we include our premium smooth operating high durometer polyurethane bushings and heavy-duty brackets. Stock end-links are retained to maintain a quiet ride on the street. For track use, our premium adjustable rod-end End Link kits are available separately (25446). Install our Sport Sway Bar System on your Ford Focus ST and reach that next level of handling and performance.

Applications:

2013+ Ford Focus ST

Features:

- Maintains excellent ride quality
- Improved turning response and cornering.
- Reduces body roll
- CNC bent for a precise fit
- Lightweight hollow construction
- Greaseable polyurethane bushings
- Anthracite powder coat for durability
- Tested and tuned for best performance

Specifications:

- Lightweight & durable 32mm tubular steel front sway bar
- Lightweight & durable 25.5mm tubular steel rear sway bar
- Front 130% stiffer than stock
- Rear 30% / 45% stiffer than stock
- Premium mounting hardware including upgraded brackets & greaseable polyurethane bushings

JOBBER PRICE:
\$420.00
