

DESCRIPTION

The new Ford Fiesta ST is a very capable high performance hot hatch. Installing our new adjustable Rear Sport Sway Bar takes it to a new level of handling performance. Spirited street cruising and competitive track driving are even more enjoyable due to improved cornering performance, driver feedback and traction. Our engineers have spent hours on the street and test track developing the best Sway Bar for ultimate performance improvement. Besides the very noticeable street driving improvement, it works extremely well in autocross, road course and open road-racing applications. Our 22mm lightweight hollow steel Rear Sport Sway bar adds 200 lbs/in of resistance for reduced roll, increased grip and quicker steering response. Our lightweight hollow Sport Sway Bars are formed on our unique CNC bender for precision, powder-coated gloss black for durability and we include our premium smooth operating high durometer polyurethane bushings and heavy-duty brackets. Stock end-links are retained to maintain a quiet ride on the street. For track use and balanced handling, our premium adjustable rod-end End Link kits are available for the stock front sway bar (25447F). Install our Sport Sway Bar System on your Ford Fiesta ST and reach that next level of handling and performance.

Applications:

2014+ Ford Fiesta ST

Features:

- Maintains excellent ride quality
- Improved stability in transitions
- Reduces body roll
- Tubes are CNC bent and end brackets are laser cut for a precise fit
- Lightweight hollow construction
- Anthracite powder coat for durability
- Tested and tuned for best performance

Specifications:

- Lightweight & durable 22mm tubular steel rear sway bar
- Added rear roll resistance of 200 lbs/in
- Premium 10.9 grade mounting hardware

JOBBER PRICE:
\$195.00
