JEGSTER 40080, 40082, 40084, 40086, 40088, GM CONTROL ARMS

These control arms are bolt on replacements for the stock rear suspension arms. These arms have urethane bushings for precision suspension control. Except for Camaro or Firebird applications, which have no upper arms, the Jegster lower control arms may be used with the stock uppers -- or -- the Jegster upper control arms may be used with the stock lowers -- or -- use both Jegster upper and lower control arms.

After properly supporting the car on stands remove the stock control arms, one at a time, and replace with the new Jegster ones. Use the stock bolts and nuts on each end.
