## JEGSTER STRUT RACK & I PINTO ADAPTOR #40202

The hole in the Strange strut steering arm must be enlarged to  $7/16''$ . The heim end should be installed under the steering arm when used with Jegster strut front ends. When used with strut front ends other than Jegster front ends, be sure to position the outer tie rod parallel to the control arm ( as seen from the front or rear ). Be sure to check for proper heim and clearance throughout the steering travel and the suspension travel.
