JEGSTER RACK & PINION ADAPTOR KIT # 40220

Assemble the rack & pinion adaptor to the Pinto steering arms as illustrated below. Some Pinto steering arms will need the small end of the hole enlarged to one half inch. Pinto tie rods will need shortened to allow clearance inside the adaptor for the end of the tie rod end. Position the rack in the center of it's travel and align the hubs straight ahead. Weld the adaptors to the tie rod. Be sure to check for proper thread engagement after setting toe in.
