

JEG'S UNIVERSAL RADIATOR & NOSE MOUNT KIT

#40404

This is a universal kit. The tubing parts of this kit are cut extra long to accomodate any installation. This drawing shows a typical assembly.

The main 1" tubes are installed over the top of the rack & pinion. Check clearance carefully. The square plates are riveted to the fiberglass nose. Fit the support tubes with the nose propped in place. This drawing shows a VW radiator mount layout.
