

# **Installation Guide**

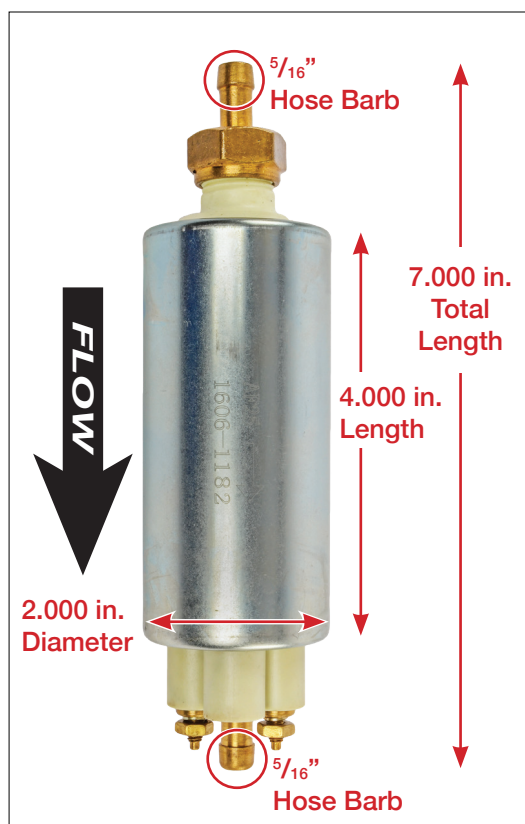

## **EFI Fuel Pump**

555-159009

# Mounting the Pump

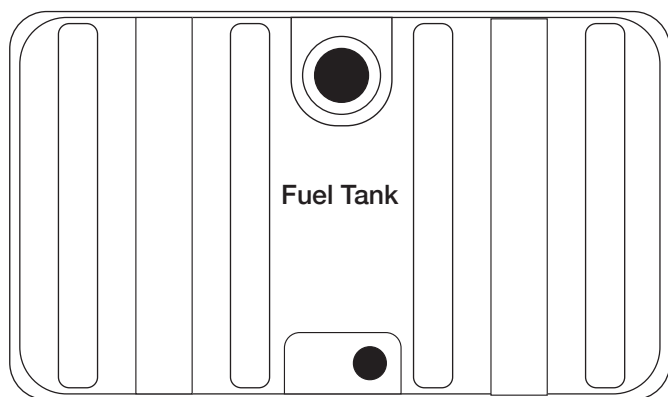

- Gravity feed the pump by mounting it lower than and as close as possible to the fuel tank.
- The pump mounts with two supplied cushioned clamps.
- Use fuel injection rated hose only.

Fuel Pressure Regulator

Post-Fuel Filter  
10-Micron

Inline  
Fuel Pump  
(MUST BE MOUNTED  
LOWER THAN THE  
FUEL TANK)

Pre-Fuel Filter  
(100 Micron)

## Wiring the Pump

- Use a minimum of 12-gauge wire for power and ground.
- Make sure ground connection to chassis is clean. Surface should be free of any paint or coating.
- Circuits should use a 10-amp fuse and 20-amp automotive relay.
