Assembly Diagram

Installation Steps

- Place the tool tray on the floor or a flat work surface upside down.
- Tighten up each wheel with the spanner wrench and make sure to keep the swivel wheels on the same sides. Double check all the wheels to ensure they are tightened to the top of the frame.
- 
- Once you have the wheels installed, flip the tool tray frame and wheel assembly back over onto the wheels.
- Insert the adjustable hydraulic cylinder to the center of the tool tray seating it into the metal frame.
- Place the seat upside down and attach the metal mounting bracket with 4 sets of bolts, nuts and washers.
- Place the seat assembly onto the cylinder and make sure the bracket seats onto the cylinder tightly.
- Use the adjustable handle on the underside of the seat to adjust the seat position.
