

Installation Instructions for 81505

Sand Blast Cabinet Rear Filter

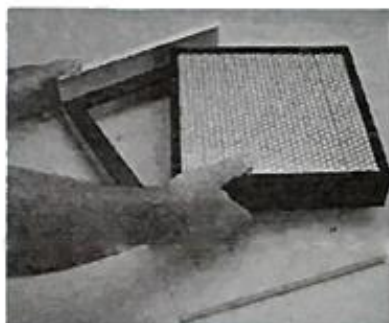

11" L x 11" W x 4" D

JEGS Intake Filter Kit mounts over the rear air inlet of your cabinet and prevents dust from escaping. Clean air comes in and clean air goes out. Kit includes complete filter assembly, mounting hardware, and instructions. Fits larger cabinets with vacuum. Does not fit units with dust collectors.

STEP 1)

Place filter assembly on bench. With a cordless drill and 1/4" nut setter or 1/4" nut driver remove screws from one side of filter assembly.

STEP 2)

Remove filter holder and cartridge from filter housing and place filter on bench.

STEP 3)

Place filter housing over rear vent hole aligning 4" hole with rear vent hole in cabinet. Level filter housing and mark four mounting holes with magic marker.

STEP 4)

Drill four 5/16" dia. holes on mounting hole marks. Then place filter housing over rear vent hole and bolt in place.

STEP 5)

Slip filter assembly back into filter housing with screen side of filter facing you.

STEP 6)

Place bottom filter holder on filter housing and screw in place with two 1/4" hex screws removed in STEP 1.

STEP 7)

Filter assembly is now installed and ready for use.

Replacement Filter Cartridge

10-3/4" W x 10-3/4" H x 2-3/4" D
