

Dry Sump Oil Pump Mount

P/N 23497

The Moroso 23497 Mounting Bracket was designed to fit with the Moroso 25630 Dry Sump Oil Pump for ease of mounting. The 23497 Mounting Bracket comes with 3 pieces, (see diagram for number of parts).

Bolt together the 3 pieces, Upper mount, #1, Lower mount, #2, and Pump mount, #3, as shown in diagram and then mount to the side of the engine and tighten all hardware. Mount the Dry Sump Oil Pump to this Bracket using the supplied mounting bolts. There are two sets of mounting holes, use the set that gets the proper belt tension for your setup. The belt should be tight with approximately 1/4" deflection, you do not want to have the belt as tight as you can make it and do not force the belt over the pulley.
