PROGRAMMING STARTS IN MAIN MENU

PRESS PROGRAM BUTTON ONE (1) AT A TIME IN THE **MAIN MENU** MODE.

1 **NORMAL/BOOST CONTROL:**

On power up, the meter usually starts operation in **NORMAL/BOOST CONTROL**. Gauge reads the sensor value as temperature, pressure, etc. The "Down" and "Up" buttons will control the brightness of the dial lighting. Press the center "Mode" button to save the setting and advance you to **PEAK PLAYBACK**

2 **PEAK PLAYBACK:**

Reads the highest value displayed on the meter since the last time the "**PEAK**" value was displayed. Pressing the "Down" or "Up" control button will control the gauge dial illumination. Press the center "Mode" button to advance to **HIGH RED-LINE SETTING**

3 **HIGH RED-LINE SETTING:**

Sets the point at which "HIGH" warning threshold is reached for that specific gauge. The "Down" or "Up" buttons will move the dial pointer to select **HIGH RED-LINE SETTING**. During normal operation the gauge constantly monitors the sensor value and compares it to the "HIGH" threshold. If the threshold is exceeded, the red "**HI**" indicator is turned on. Press the center "Mode" button to save the setting and advance to **LOW THRESHOLD SETTING**

4 **LOW THRESHOLD SETTING:**

Set the Minimum Threshold: Sets the point at which "**LOW**" warning threshold is reached for that specific gauge. The "Down" or "Up" buttons will move the dial pointer to select the **LOW SHIFT SETTING**. During normal operation the gauge constantly monitors the sensor value and compares it to the "**LOW**" threshold. If the sensor value drops below the threshold, the yellow "**LOW**" indicator is turned on. Press the center "Mode" button save the setting and advance to **5 COLOR SCHEME**

5 **COLOR SCHEME:**
