Portatree Mini – Installation Instructions

Overview:

Thank you for purchasing the *Portatree Mini* half-size practice tree! These instructions demonstrate how to install the practice tree mount on the back of your Eliminator Super 2000 practice tree. If you have any questions regarding the *Portatree Mini*'s aluminum base stand or the practice tree mount, please give our tech team a call or send us an email!

Materials Included:

- 4 #8 Sheet Metal Screws
- 1 5 3/4" x 2 7/8" Aluminum Sheet

Installation:

- 1.) Remove the practice tree mount from the plastic bag
- 2.) Lay the Eliminator Super 2000 face down on a flat surface
- 3.) Position the 5 3/4" x 2 7/8" Aluminum Sheet on the back of the Eliminator Super 2000 such that the 4 holes align with the mounting holes on the back of the Eliminator

Note: The Aluminum Sheet should be positioned such that it overlaps the wire stand of the Eliminator Super 2000.

- 4.) Once the practice tree mount is installed, slide the Eliminator Super 2000 onto the front lip of the *Portatree Mini*'s base stand
- 5.) Plug the 25-pin connector from the *Portatree Mini* into the right side of the Eliminator Super 2000
- 6.) The system is ready for practice!

Note: The instructions use the Eliminator Super 2000 as an example, but the practice tree mount can be used with other practice trees instead
