IMPORTANT

This product has more surface area than your factory grille. It may reduce airflow into your vehicle. Reduction in airflow can potentially lead to overheating issues.

This product has been pre-bent to fit the contour of your vehicle grille shell. However, it may have partially flattened during shipping. It may be necessary for you to re-bend in order to get a good fit.

Professional Installation Recommended

Always disconnect battery before servicing any fuses or electrical system.

STEP 1

Remove factory OEM grille by using a flat head screw driver to twist (7) tabs counter-clockwise in the grille from the vehicle. See Figure 1 and Figure 1.1.
