

Kit# RTBA65K
Optional Rear Trackbar
For 6" TJ

6" REAR TRACKBAR KIT
SPECIAL INSTRUCTIONS

NOTE: This is an accessory kit for TJ's lifted 5-6" that are NOT equipped with a SKYJACKER® suspension

Place new trackbar relocating bracket over the OEM trackbar mount at differential. Place the new 12mm x 70mm bolt through the original trackbar location. Use the supplied spacer (#54314) to fill the space where the OEM track bar was located. Apply lock nut and tighten. Drill a 1/2" hole through the hole in the driver's side of the new bracket.

Install the 1/2" x 1 1/4" bolt with washers on each side through the newly drilled hole and tighten with self locking nut. Install the 5/16" x 1" fine thread bolt, washers and nut into the forward hole of the new bracket. Place the trackbar into the upper hole of the new bracket using the original hardware and tighten once vehicle has been lowered to the ground.
