ITEM	QTY	CHECK	PART NUMBER	DESCRIPTION
1	1	☐	M27000T	Custom SLP DiabloSport Predator
2	1	☐	*****	Instructions

NOTE: This is a supplement to the user manual provided with the Predator by DiabloSport. This supplement contains information pertaining specifically to the custom SLP Predator for the 2003-04 SVT Cobra.

SUPPLEMENTAL INSTRUCTIONS

This replaces item # (1)(B) under "Installing the Tune for the First Time" on page 3 of the Mustang Cobra Predator User Manual.

B. Select tune you wish to install.

SLP Tune: For stock or lightly modified vehicles running factory boost levels. This tune works with any combination of SLP's exhaust components. Not for use with higher than factory boost levels.

SLP Tune w/MAF: This is the same as the regular "SLP Tune" but recalibrated for the SLP 95mm MAF Sensor (M23000).

SLP Pulley Tune: This is tuned to work with all the components in SLP's PerformancePac[™] except the 95mm MAF Sensor. Any vehicle with the 2.80" pulley (M10002) and factory MAF sensor should use this tune. It will work well with any combination of SLP's exhaust components or even the factory exhaust.

SLP PerformancePac: For use with the complete PerformancePac[™]. This is the same as the "SLP Pulley Tune" but recalibrated for the SLP 95mm MAF Sensor (M23000).

NOTE: All Custom SLP Tunes require premium fuel at all times.

Factory HP Tune: Factory tune with no tuning by SLP.

NOTE: Factory HP Tune must be modified in order to allow install.

Original Backup: This will restore the original (once the backup has been completed).

The following changes apply to the "Modifying Parameters" section of the DiabloSport Predator User Manual.

1. On page 5 under "Fuel Base" the range of adjustment for WOT Fuel for the Custom SLP Predator is +40% & - 5%.

2. On page 5 under "Spark Advance" the range of adjustment for WOT Spark for the Custom SLP Predator is +5% & -40%.

NOTE: These tunes were optimized to work specifically with the SLP PerformancePac[™] and the performance equipment included therein. SLP cannot guarantee compatibility of this product when used in conjunction with aftermarket performance equipment other than that which is included in the SLP PerformancePac[™], or specifically approved for use by SLP.

WARNING: Always be sure you are installing the correct tune for the SLP equipment you have installed on your vehicle. Installation of one of the above tunes with the incorrect combination of SLP equipment can cause severe engine damage. If you are unsure which tune to install call an SLP representative before proceeding.
