- Wire Harness with Tail Light Converter
- Battery Connection Wiring
- Fuse Holder
- Fuse
- Wire Crimp Ends
- Wire Ring Terminal
- Double-Sided Tape Square
- Mounting Hardware
- Wire Ties
- Dust Cover

CIRCUIT PROTECTED CONVERTER SYSTEMS

This product is a circuit protected converter system for the power head of the tractor. The wire harness installed as part of your four wheel loader or tractor provides protection from electrical fire. The system is designed to protect the battery and the engine from the power of the battery should the battery become shorted to the ground plane.

If the battery voltage drops below the set point, the system will shut down the power to the battery and the engine. This prevents the battery from being drained and the engine from running on the battery.

Installation:

1. Check the voltage level.
2. Check the battery connections.
3. Check the system for shorts.
4. Load and check for shorts.

Warning: Do not touch the battery terminals or the engine while the system is operating. Check your local safety rules and frequently use the manual.

OMP P-103-04
